

## THE GEAR

-  **RODS:** night fishing for carp is done using casting rods.
-  **BAIT:** the night fisherman may only use vegetable bait (corn grains, peanuts, etc.) or blended flours, i.e. boilies or various pastes rich in proteins, as bait or groundbait.
-  **CASTING OF LINES:** lines and baits must be cast from the water's edge or set down only by means of a remote-controlled craft.
-  **THE BITE DETECTOR:** the audible bite indicator cannot be heard from more than ten metres away. In addition, its use is prohibited within 50 metres of any dwelling.
-  **ALTHOUGH:** not mandatory, the use of an unhooking mat is strongly recommended for night carp anglers.

## ALL FISH ARE RELEASED!

Only carp fishing is allowed at night. All fish caught, including carp, must be **immediately and freely** released at the place of capture.

The fisherman cannot be in possession of fish caught during the daytime fishing period.

**Always keep  
an eye on your line**

## THE BIVOAC

Lake and pond managers may prohibit or restrict night fishing for carp if they deem it appropriate for any reason. For this reason, be sure to ask before you go night fishing on the water bodies in the stillwater zone.

### NO LEGAL PROVISION PROHIBITS A FISHER FROM INSTALLING A BIVOAC, IF :

- the latter is located in a public forest,
- police regulations have been adopted in this sense by the above-mentioned municipalities or managers of the lakes and ponds.

Although it is possible to set up a bivouac, it is still forbidden to make a fire.

Please respect the environment of the bivouac by taking your waste away after your fishing session
